An Illustrative groff document

Dmitry Fedotov

Introduction

We've talk about basic formatting, including titles, sections and bold and italic commands as well as basic document options. Now we'll not only learn a couple more commands, but we'll talk about creating custom macros.

Formatting

We can do some more formatting here. The last word of this sentence is (**bold**). One thing we can do is underline text. Another thing we can do is create boxed text

Macros

- This is a list item
- Here is another list item
- And another

Here's a break

- This is a bulleted item
- Another bulleted item
